

SHOP SODIUM SMART

Decode the Claims

- **Low Sodium:** ≤ 140 mg per serving
- **Very Low Sodium:** ≤ 35 mg per serving
- **Salt/Sodium-Free:** <5 mg per serving
- **Unsalted:** No salt has been added

Sources of Sodium

- Sodium isn't only in the salt shaker and salty snacks!
- It is used as a preservative in many boxed, canned and prepared foods (75% of the sodium we eat)
- Inexpensive way to add flavor
- Condiments and marinades typically contain high amounts

Eat Sodium Smart

- Skip the salt shaker -- try herbs, spices, citrus or vinegar instead
- Use salt-free seasoning blends
- Rinse canned foods to reduce salt by about 30%
- Buy low sodium varieties of your favorite products
- Limit cured foods, including cold cuts and sausages
- Choose fresh, plain meats without breading or marinade
- Eat plenty of fruits, vegetables and whole grains

* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

What does salt do in my body?

A high sodium diet can raise blood pressure, which is hard on your heart!

*Whole foods such as fruits, vegetables, lean meats, fish, unsalted nuts and seeds, and eggs are naturally low in sodium
